AQUAMOBIL

Allows to perform professional underwater massage in standard tubs at SPAs, hospitals or home. Maximum mobility with 2 long, flexible hoses. Robust, standalone unit with 4 castors with brakes. Handheld hose with a set of interchangeable nozzles gives a relaxing, deep massage to the muscles or subcutaneous tissues. Clean and simple top panel with elegant chromium-plated tap, pressure gauge, electronic controls and electronic thermometer.

Product features:

- 3 interchangeable water nozzles
- electronic control panel with electronic thermometer
- built-in disinfection system
- pressure control gauge
- pump „dry-run” protection
- suction and massage hoses
- castors with brakes
- transport handles
